PROFILE SUMMARY

CS undergraduate specializing in AI/ML and full-stack development, with hands-on experience building deep learning applications and REST API-driven web systems across the full stack from model training and deployment to frontend integration using Python, TensorFlow, and modern JavaScript frameworks. Seeking software development and AI/ML roles where applied engineering drives real-world impact.

SKILLS

- Programming Languages: Python, Java, C++, SQL, HTML, CSS, JavaScript.
 - Frameworks & Libraries: TensorFlow, Keras, PyTorch, React, Node.js, Express.js.
 - Tools & Platforms: Git, GitHub, HuggingFace, MongoDB, Google Colab, VS Code.
 - Domains: Artificial Intelligence, Machine Learning, Computer Vision, Full Stack Web Development
 - AI Tools Used: Claude, GitHub, Copilot, ChatGPT, Deepseek.
 - Soft Skill: Adaptability, Leadership, Problem-Solving.
-

TECHNICAL PROJECTS

Rice Blast Disease Detection System

Tech: Python, TensorFlow, CNN, OpenCV, Streamlit

- Built an end-to-end disease severity classifier that processes rice leaf images in real time, enabling farmers to receive instant diagnostic feedback through a web upload interface.
- Designed a multi-class CNN pipeline using TensorFlow/Keras with OpenCV preprocessing, achieving structured severity-level outputs across healthy, mild, moderate, and severe categories.
- Deployed the model as an interactive Streamlit application, reducing the barrier to agricultural diagnostics for non technical users with zero software installation required.

LearnChat AI — AI Learning Platform

Tech: React.js, Node.js, Express.js, Google Gemini API, HTML, CSS, JWT

- Built a full-stack AI learning platform with Google Gemini, featuring interactive chat, image analysis, auto-generated quizzes, study material downloads, and progress tracking.
 - Secured the application with JWT, bcrypt, CORS, and rate limiting; designed a modular in-memory store with a clear MongoDB migration path.
 - Deployed a responsive React frontend on Vercel and a Node.js backend on Render, achieving sub-3-second API response times.
-

EDUCATION

UG - B.Tech, Computer Science and Engineering, Sastra University, Thanjavur | CGPA: 7.85 | 2023–2027(Expected)

HSC - Vivekananda matriculation higher secondary school, sirkali | 95.50 | 2022–2023

SSLC - Vivekananda matriculation higher secondary school, sirkali | 80 | 2020–2021

CERTIFICATIONS

- Artificial Intelligence — NoviTech R&D Private Limited (Jan 2026)
- Networking Basics — Cisco Networking Academy (Oct 2025)
- Full Stack Development — NoviTech R&D Private Limited (Sep 2025)
- Mobile App Development — Informatica Cluster (Participation) (Mar 2024)
